Professional Summary

Motivated Computer Science student specializing in Data Science with hands-on experience in Machine Learning, IoT, and Full Stack Development. Skilled in developing real-time monitoring systems, deep learning models, and responsive web applications using Python, TensorFlow, PHP, MySQL, and ESP32-based IoT devices.

Education

SRM Institute of Science and Technology <i>B.Tech in Computer Science and Engineering (Data Science)</i>	2022 – 2026 CGPA: 7.8/10
Bhashyam Junior College <i>Class XII – MPC</i>	2020 – 2022 78.4%
Indus High School <i>Class X – SSC</i>	2020 92.1%

Technical Skills

Programming Languages: Python, C, SQL, PHP
Web Technologies: HTML, CSS, JavaScript, PHP
Libraries & Frameworks: TensorFlow, Keras, Pandas, NumPy, Matplotlib
Database: MySQL
Tools & Platforms: Git, GitHub, VS Code, Arduino IDE, Jupyter Notebook, XAMPP
Core Concepts: Machine Learning, Deep Learning, CNN, IoT, REST APIs, JDBC, Data Analysis

Projects

Potato Leaf Disease Detection using CNN <i>Deep Learning Project</i>	Sept 2024 – Jan 2025
- Built a Convolutional Neural Network (CNN) model using TensorFlow and Keras for automated potato leaf disease classification. - Applied image preprocessing and augmentation techniques including normalization, flipping, rotation, and zooming to improve model performance. - Enhanced disease prediction accuracy and reduced overfitting through CNN optimization and hyperparameter tuning. - Contributed toward precision agriculture by enabling early disease detection and minimizing crop loss.	
MedConnect – IoT Based Health Monitoring System <i>IoT + Machine Learning + Web Application</i>	Feb 2025 – May 2025
- Developed a real-time patient health monitoring system using ESP32 and MAX30102 sensors. - Integrated Machine Learning models to analyze sensor data and predict health-related parameters. - Designed a responsive dashboard using HTML, CSS, PHP, and MySQL for real-time patient data visualization. - Implemented secure authentication systems for doctors and patients with JDBC-based database connectivity. - Displayed live heart rate, SpO2, and predictive analytics through a centralized healthcare dashboard.	

Certifications

- AWS Academy Machine Learning Foundations – AWS Academy
- Google Data Analytics Capstone – Google
- Arduino Certification – Udemy
- Raspberry Pi Certification – Udemy

Achievements

- Finalist in OODP Hackathon 2023.
- Solved 150+ coding problems on LeetCode, HackerRank, AdventOfCode, and InterviewBit.
- Developed multiple Machine Learning and IoT-based academic projects.

Leadership & Extracurricular Activities

May I Help You Foundation

May 2024 – Jun 2025

Volunteer

- Participated in community outreach programs, educational support initiatives, and social service activities.

ISTE Student Chapter, SRMIST

Feb 2025 – Present

Student Member

- Attended technical workshops, seminars, and collaborative innovation activities.

Directorate of Student Affairs (DSA), SRMIST

2025 – Present

Operations Committee Head

- Managed operational planning and execution of student engagement events and university activities.

Soft Skills

- Problem Solving
- Leadership
- Communication
- Team Collaboration
- Time Management
